

Competency Statement 6.

To maintain a commitment to professionalism.

Functional Area 1: Professionalism

In order to fully commit to professionalism many things must be done. A dress code, further staff training, hiring high qualified workers, keeping the facility clean, maintaining equipment, keeping paperwork organized, and offer outstanding services. I will uphold a self image of a professional child care provider. I will conduct myself as just that. I will eagerly seek out trainings to always further my knowledge in child care. Child care has lots of paperwork and I am very good at staying organized so I will implement that in the center and expect that of others. I will maintain a professional relationship with all the staff and parents. Being friendly but not getting too involved, as it could diminish the professionalism. I will always find ways to improve myself and the facility. I will strive to challenge myself and others.
